SHORT BIO:

Prof. Michele Muccini

Michele Muccini is Director of Research at the Institute for nanostructured materials of the Italian National Research Council (CNR-ISMN) and President of the public-private industrial consortium MISTER Smart Innovation. His research interests and activity span from advanced materials, organic photonics, bioelectronics and functional optoelectronic devices for a variety of application fields, including health, energy and sustainability. Muccini has been Director of CNR-ISMN and founder and managing director of a start up in the field of advanced optoelectronics and has long standing hands on experience in the development of synergies between academic research and industry.
